The harbour of Esbjerg as a breeding site for terns: Conflicts and the potential value of the harbour as a source habitat

- Thomas Bregnballe & Ulf Berthelsen (Aarhus University)
- Peter Tougaard (BirdLife Denmark)
- John Frikke (The Wadden Sea National Park)
The idea:

Terns are faced with challenges in their attempt to breed with success
• Predators
• Flooding
• Disturbance

Can we find or create one or more breeding sites where terns can nest with a high chance of producing potential recruits to the more natural breeding sites
